PROJECTS

AccountaBee | Fullstack Developer | 10/2020
www.github.com/AccountaBee

A mobile app, combination of a to-do list and social network service that cheers people to achieve their goals
- Designed entire UI/UX wireframes and prototypes in Figma
- Implemented a news feed with animated buttons, a todo list with modals, toast notifications and an animated splash screen
- Developed with React Native, Expo, Redux, Firebase Authentication, and Node.js Server deployed to Heroku, PostgreSQL, Sequelize ORM

HYKM's Bookstore | Fullstack Developer | 09/2020
www.github.com/yoonhee-cho/graceshopper

E-commerce website for textbooks
- Wrote re-usable React components to display products and styled using Flexbox
- Wrote unit test specs and tested React components APIs endpoints, database models with Mocha and Chai
- Created with React, Redux, Node.js, Express.js, PostgreSQL, Sequelize

MEAL :P | Solo Developer | 09/2020
www.github.com/yoonhee-cho/MEAL-P

Meal plan, grocery shopping list and budget managing tool
- Built with React, Redux, Material UI, recipes API, Express, PostreSQL, SequelizeORM

EXPERIENCE

Alexander Wang | Handbag Assistant Designer
New York, NY | 07/2015 - 10/2016
- Collaborated with international and domestic tanneries, manufacturers and hardware suppliers from the inception of the design to approval for mass production
- Build an internal metal hardware library system and saved 30% of hardware development cost
- Managed 4 -6 seasonal interns per a year

The Row | Handbag Design Intern
New York, NY | 01/2015 - 05/2015
- Did multi-tasking by drawing detailed sketches and quickly making prototypes in fast-paced environment
- Created color matching options of bag straps using Adobe Photoshop
